*ICU Bronchoscopy* is an emerging modality in the field of Pulmonary and Critical Care domain, with the role of Bronchoscopy transforming from a privilege to a basic necessity in ICU practice both for Pulmonologists and Critical Care Specialists. While the Life Supports are a norm in ICU, the grave need for precise diagnostic approach and life saving therapeutic potential lies in Bronchoscopy. This involves a lot of protocols, rationale and various SOPs at various centres.

This workshop will add value to your pulmonary practice with didactic lectures, live cases and immersing you in the action plan of challenging case scenarios. To stand apart and create an own niche for yourself, this workshop is designed to address the need at any level of Care - Primary, Secondary and Tertiary.

Join us to know, The role of second hands and third eye in ICU  
**BRONCHOSCOPY.**
