RESPIRATORY
EXAMINATION

Dear Esteemed Colleagues,

We extend a warm welcome to the Objective Structured Clinical Examination (OSCE) workshop, a prominent feature of NAPCON-2023. We are truly pleased to introduce this specialised workshop, tailored for residents pursuing DNB/MD/DM courses.

The primary objective of this workshop is to equip participants with the essential skills necessary for excelling in the OSCE format. It will provide valuable insights on how to effectively prepare for OSCE, master the art of presenting cases and proficiently interpret a range of investigations within the context of OSCE. This unique educational opportunity serves to familiarise participants with the practice of virtual examinations, a valuable asset for those pursuing international fellowship exams, as well as MD/DNB/DM exit exams.

Throughout the course of this workshop, our distinguished faculty will impart their knowledge through a series of informative lectures covering a wide array of topics. Additionally, interactive case-based discussions will be a pivotal component of the program, designed to bolster your competency and readiness for exit exams.

We wish to express our sincere appreciation on behalf of the organising committee to our esteemed faculty, whose unwavering support has made this workshop a reality. Their dedication exemplifies a shared commitment to the advancement of medical knowledge.

Regards,

Dr. V. Laxman Babu
