Organized by:

Department of Pulmonology
KIMS Hospitals, Kondapur

THE SCOPE OF PEDIATRIC BRONCHOSCOPY

Dear Delegates

Pediatric bronchoscopy is an evolving and demanding field that requires tactful handling of not only the scope but also the child . With the increasing trend of respiratory infections, advent of the newer, tiny scopes with smaller working channels pediatric bronchoscopy has expanded its horizons from being just a diagnostic procedure to therapeutic intervention. This is crucial for diagnosing various respiratory conditions, such as congenital airway anomalies, foreign body aspiration, and structural abnormalities. This can be life-saving in cases of severe airway blockages. There is shortage of Pediatric bronchoscopists even in third tier cities owing to poor exposure during post graduation, the ever evolving scopes and the lack of training facilities.

This workshop shall address these issues and help guide the budding pulmonologist to save budding lives- AS THE SEED for BRONCHIAL TREE HEALTH is Planted in childhood for FRUITFUL ADULT LUNGS

Course Coordinators

Dr. Subhakar Nadella

Dr. Venkateswara Reddy. T

International Faculty

Dr. Ashkan Mohammad
Iran

National Faculty

Dr. Sushil Jain

**Dr. Srinivas
Kishore**

**Dr. Abhinav
Chowdary**

Dr. Srikanta

Faculty

Dr. Gopala Krishna
